

PANOPTIKUM COLLECTIONS

The "Bubbles collection" is an example of an emotional design that appeals to our inner child. The collection is inspired by excitement from childhood, provoked by the first reaction to rainbow-colored soap bubbles and pink bubble-gums. Colour palette: pastels and pure, rich colors and textures, gloss and matte coating of the facades.

An airy array of the «bubbles» masking the load-bearing console between the two functional cubes of the cabinet creates a dynamic contrast of shapes, like a layer of puffy cream in a cake.

Due to its cubes' height, the item can function as a cabinet or a drawer unit.

“There are no bad ideas, in the process of discussion we take the best from each.”
